Calculus and Analytic Geometry Page 5 MODULE I CHAPTER 1: NATURAL LOGARITHMS The natural logarithm of a positive number x is the value of the integral $\int_1^x \frac{1}{t} dt$. It is written as $\ln x$ i.e., $\int_1^x \frac{1}{t} dt = \ln x$. Remarks 1 If $x > 1$, then $\ln x$ is the area under the curve $y = \frac{1}{t}$ from $t = 1$ to $t = x$.

In recent years analytic geometry and the calculus have been combined into one course for the first or second year of college mathematics, and several excellent texts have been published for this purpose. However, these texts give primary emphasis to the calculus with a correspondingly reduced content in analytic geometry.
